AED Trainer

A universal AED training device for more efficient BLS, First Aid, and Community CPR programs

Designed to represent the typical AED user experience, the AED Trainer helps build basic competency in using an AED device as part of more efficient BLS, First Aid, and Community CPR programs. Simple enough for bystanders and powerful enough for professionals, the hand-held device can be used for standalone AED training or as part of CPR scenarios integrating with QCPR app.

Users can quickly and easily use one device on its own or up to a full classroom all controlled by the same app.

AED Trainer

Classroom Friendly

Control one or many AED Trainers with the same app.

Pre-set Scenarios

Simulate the most common scenarios.

Future Proof

Designed to be easily upgradable for tomorrow's needs.

LINK Compatible

Get automatic pad placement detection with LINK manikins.

Universal Design

Built using conventions from market leading AEDs.

QCPR Enabled

Integrate your AED Trainers and QCPR manikins in the same classroom.

Language Options

Easily change AED prompt languages.

Environmentally Conscious

Improved design and use of recycled material reduces CO2 impact.
