- Nebulisation rate: 0.2 ml/min. (NaCl 0.9%)
- Particle size: $\approx 5 \mu\text{m}$ (MMAD)
- Acoustic noise level: < 30 dBA

Key features

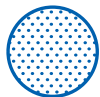

Portable – Easy for travel

Ultra light and silent

Biocompatible
Phthalate and BPA free material

Stainless steel mesh

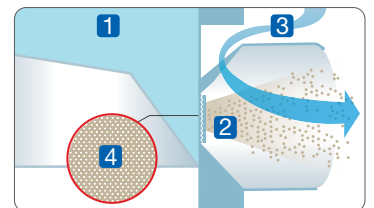

Auto off

Automatic switch-off

Efficient Nebulisation System

- 1 Medication (prescription only).
- 2 Aerosol of medication: $5 \mu\text{m}$, capable of penetrating the drug quickly and deeply into the lungs.
- 3 Efficient venturi system: Draws in ambient air, quickly delivers the medication particles, so it shortens the therapeutic session.
- 4 Mesh:
 - High anti-oxidized mesh delivers stable particles whilst providing a longer lifetime for the device.
 - High vibrating frequency (approximately 103 ~ 123 kHz) increases the nebulisation rate.

Fully equipped

- With adult and child face masks, mouthpiece and carrying bag
- Easy storage and transportation
- Intuitive design for comfortable filling of medication
