

PHILIPS

DreamStation 2

DreamStation 2 Advanced

Advanced care designed to
meet your patient's needs

Evolving to a new way of doing business

Treating patients for obstructive sleep apnea (OSA) is more complex than ever. The need to minimize personal contact and increase connectivity has led to the heightened importance of home delivery.

There is a clear need for simplified, customized solutions that help you get patients started on sleep therapy quickly, safely and comfortably.

Dreamstation 2 Advanced is designed to help you provide your patients with optimized therapy and enhanced connectivity, with intuitive navigation of comfort features and settings to help reduce callbacks, proprietary algorithms which automatically adjust pressure and connectivity with Philips Care Orchestrator for remote patient monitoring helping to prioritize those in need of intervention.

The OSA Journey

Philips DreamStation 2 Advanced

Advanced care designed to meet your patient's needs

Simplified.
Intuitive.
Committed.

Designed to customize care and optimize therapy, Philips **DreamStation 2 Advanced** has been developed to provide personalized therapy and adjust to meet your patient's needs*.

Patient setup and training

Efficient setup: Flexibility in the setup process allows you to choose what is best for your business.

1. Out-of-the-box, no-touch setup¹
 - Accept data-driven defaults
 - Personalize remotely with Care Orchestrator
2. Streamlined, low-touch, first-ever guided setup on the device

Simplified training: The CPAP features intuitive navigation of comfort features and settings, along with easy handling of the device.

Precision mask fitting: Mask Selector technology to help determine a precise and personalized CPAP mask recommendation.

RTs set up **DreamStation 2 Advanced** 28.7% faster than DreamStation on first try.²

Initiation

Three easy-to-access comfort settings: Patients can make live adjustments of Ramp Plus, humidification and heated tube temperature while therapy is running.

- Ramp Plus allows patients to set a comfortable starting pressure for falling asleep, which may also help reduce callbacks and adjustments to minimum pressure prescriptions.

Micro-flexible 12mm heated tube: Philips smallest-diameter tubing is designed to be comfortable while taking up less space than traditional tubing.

Smart auto and advanced algorithms: Proprietary algorithms automatically adjust pressure to provide personalized therapy and treat AHI's at lower pressures.³

Ongoing compliance

Enhanced connectivity: Integrated cell modem with simplified Bluetooth pairing enables remote setup and easy access to data for both your care team and your patients.

- On-demand prescription changes
- Remote troubleshooting through Performance Check

Philips Care Orchestrator: Drive collaboration among your team with patient insights delivered straight to smartphones, tablets or PCs.

DreamMapper app keeps patients engaged with easy access to coaching to drive ongoing compliance.

Patients struggling with adherence to sleep therapy have a **283% higher success rate.**⁴
